Battle for Pandora: guide for clan DMP

An alliance-versus-alliance battle on the Pandora map. It lasts **30 minutes**. You capture buildings, they keep earning points, and whoever has more points at the end of the battle wins. It runs on a schedule as a limited event in the «Incidents» tab.

1. Registration and roster

- Entry: **Incidents → Battle for Pandora**.
- The roster is assigned by **R4 or R5** during registration: up to **20 starters** and up to **10 substitutes** per alliance. Starters enter the map earlier.
- The list **locks the moment registration ends** and does not change, even if someone leaves the alliance. Latecomers cannot be added.
- The opponent is matched by the **combined combat power** of the assigned players (each player's best record counts).
- The battle time is chosen with the «Select time» button. The 30-minute window is shown in your game time zone.
- The event menu has: log, rules (tabs «Rules», «Buildings», «Rewards»), history and a shop.

For R4/R5: lock the starters before registration ends. Put the strongest players in the starting 20 and keep substitutes ready to replace those who cannot come.

2. Battle timeline

Time	What happens
5 minutes before the start	Starters enter the map. Both sides spawn in the left and right safe zones, where attacks are not possible. You are blue, the enemy is red
0:00 — phase 1	You can capture: Research Institute, Station, Power Plant, Hospital
10:00 — phase 2	Unlocked: Central Lab, Armory, Electromagnetic Tower
13:00 — phase 3	Oil Wells appear: send troops there to gather
30:00	The battle ends, the side with more points wins

3. How points are earned

Holding buildings is the main source. Buildings give points continuously while you hold them: Central Lab, Armory, Electromagnetic Tower, Research Institute, Station, Power Plant, Hospital.

Building	Unlocks	What it gives
Hospital	0:00	A moderate amount of points for capture. Heals **15 wounded soldiers every 10 seconds** (90 a minute) for the side that holds it
Station	0:00	Points for holding
Power Plant	0:00	Points for holding
Research Institute	0:00	Points for holding
Electromagnetic Tower	10:00	Points for holding
Armory	10:00	Points for holding
Central Lab	10:00	The main target of phase 2
Oil Wells	13:00	While gathering goes on: **5 points per second to the alliance and 5 per second to you**, plus a small gathering bonus

Supply crates. A building stores points, and they can be «pillaged» after a while. When a building changes hands, crates scatter around it. Send **scouts (drones)** there and pick them up faster than the enemy: these are extra points.

Personal vs alliance points. Only alliance points decide the victory. Personal points are for personal rewards.

4. Oil Wells: the math

A well gives **5 points/sec to the alliance and 5 points/sec to you**. Over 17 minutes (from 13:00 to the end) one squad on a well brings up to **5,100 points to the alliance** and the same to you personally. That is little compared to buildings, but personal points count toward personal rewards.

Rule: send a **separate squad** to the wells, not the main one. The main squad is busy with buildings and fights.

5. Squads for battle

- For building fights you need **one durable first squad**: two tanks, not a fragile arena lineup.
- If possible, build **five heroes of one faction**: you get a bonus to HP, attack and defense for the same type.
- For all 30 minutes keep **the same five heroes**. Do not put unbuilt heroes into the battle midway.

Hero names are given as they appear in the game (in Latin letters).

Option	Front	Back	Note
Free: Warriors	Arnold, Dirk	Monroe, Carter, Nora	Five Warriors, same-type bonus. Arnold and Dirk hold buildings, Monroe is the main damage dealer. No Dirk: put Zara next to Arnold
Free: few URs	Arnold, Zara	Monroe, Nora, Logan	If Dirk and Carter have no stars yet. Toxina can replace Zara if she is your best tank
Spender: two strong cores	Arnold, Bekka	Monroe, Leah, Carter	The sturdiest front and two strong damage dealers. Victor instead of Carter if you need to finish off the enemy backline. Two factions: you lose the same-type bonus and gain hero strength
Spender: Warriors with Hero Pass	Arnold, Dirk	Monroe, Katya, Lucian	When the Hero Pass heroes are already built. Five Warriors. Do not use a hero without stars just because the battle is on
Spender: Tacticals	Vince, Bekka	Leah, Kim, Mina, Taylor	Only if your Tactical five is stronger than your Warriors. Do not break a built Warrior squad for this on battle day

Advice: upgrade the heroes you already have. Do not buy a new hero on the morning before the battle.

6. Rewards

Alliance rewards

Participation	Winner	Loser
Team A only	Gold crate, purple crate, 330 construction speedups (5 min), 32 food, 32 iron, 32 ammo, 220 wood	Purple crate, 165 speedups (5 min), 16 food, 16 iron, 16 ammo, 110 wood
Teams A and B	Gold crate, 210 speedups (5 min), 20 food, 20 iron, 20 ammo, 140 wood	Purple crate, 120 speedups (5 min), 12 food, 12 iron, 12 ammo, 80 wood

Participation rewards

Result	Reward
Winning participants	100 construction speedups (5 min), 10 food, 10 iron, 10 ammo, 10,000 honor, 100 wood
Losing participants	50 construction speedups (5 min), 5 food, 5 iron, 5 ammo, 5,000 honor, 50 wood

Personal rewards (winning alliance)

Personal points	5-min speedups (construction, training, healing — each)	Honor
10,000 – 99,999	20	2,000
100,000 – 149,999	40	5,000
150,000 – 199,999	60	10,000
200,000 and up	80	15,000

The losing alliance also gets personal rewards by points: a shield crate and 15, 30, 45 or 60 of each of the three 5-minute speedups. Honor follows the same brackets.

7. Battle control

Base (castle)

- You and the enemy each have **4,000 HP**: four hits of 1,000.
- Fire does not deal damage. Destroying a base **does not kill soldiers**.
- A destroyed base respawns in the safe zone at a random place and you are back in the fight.
- The real penalty for being razed is lost seconds and position, not troops.
- If the enemy fortress has no defenders, the attacker **does not lose soldiers** when taking it.

HP left	What to do
1,000 or less	Nothing to lose, attack first
4,000 (full)	You can take a couple of hits and wait for the teleport cooldown
Enemy at 3,000 or less, no defense	Do not send all squads, send just enough to finish

Garrison

- Put your main squad into the garrison only when the teleport is on cooldown and there is nowhere to go, or when one enemy hits your base with all four squads: three of them will probably crash into your garrison.
- If you are being overrun, do not play the hero: counterattack with a weakened squad of one hero, find a new teleport spot in advance and check the alliance chat.
- **Weaker players before the start:** take heroes off the wall or leave only your weakest squad in the garrison.

Squad rules

- **A moving squad cannot be redirected.** It must first return to base. Plan the route in advance.
- Keep one or two squads on the wall: the main one and the second strongest. If you are not sure about handling two at once, keep only the main one.
- **The main thing is to save soldiers.** Without them you are useless to the team.
- If you are not among the alliance’s top three strongest players, only your main squad really fights. The others are decoys: minimum soldiers, the weakest hero, the task is to take empty buildings and distract the enemy.
- The enemy teleported or an ally destroyed him, and your squads are still heading to an empty spot: recall them at once (click the squad in the list or on the map).

Tactics by power ratio

Opponent	Action

Weaker than you	Attack with the first squad, cover with the second. With a small gap his main squad can still break your second
Equal	Attack with the first squad. If his main squad hits your fortress, pull the second squad out of it. Or play from defense: lure the enemy into your fortress and use the second squad as bait, recalling it in time
Stronger	Defense only. Find his main squad (by the Arnold or Dirk icon) and avoid fighting it, fight the second one
Far stronger	Pull troops out of the fortress and teleport away at the first chance. If your level is below 24 and the enemy's is 24 or higher (same for 27), you have almost no chance: other troop classes unlock from those levels

Universal rule: the enemy pulled troops out of the fortress — hit with all squads at once to destroy it faster.

Tricks

Before each decision quickly assess: is the enemy stronger, is he alone, does he have a garrison, are his other squads equipped, how long ago did he teleport and how many soldiers does he have left.

Trick	When to use
Crushing blow	You can finish the enemy: do it at once
Minimap return	You are about to be sent to respawn: click the right spot on the minimap in advance so the camera is already there after the teleport
Seesaw	One squad without support is heading to your base: let it lose to the garrison and counterattack at once with the same lineup. The enemy gets two defeats in a row
Decoy	Equip the second squad to look like the main one, send it in plain view and watch the reaction. If the enemy «opens up», repeat with the real main squad
Insurance	The enemy plays cat and mouse: send a reserve squad together with the main one. If the main one has to turn back, the reserve finishes the target
Quick return	You must defend a target at any cost: teleport on the spot to instantly return a broken squad to the fight
Teleport straight onto a building	Squad marches are slow, teleports are not. Teleport directly onto a free target
Preventive teleport	Your base is about to burn: do not wait, teleport in advance and do not lose time on respawn
Leave the danger zone	Auto-battle does not always dodge area abilities. Watch for the wind-up animation and move the squad by hand

⚠ **Healing through alliance help does not work in Pandora.** Only speedups.

8. Plan for 30 minutes

Time	What to do
15–30 minutes before the start	Agree on roles and the plan in alliance chat. Weaker players take heroes off the wall, check equipment
Be in game 5 minutes early	Starters enter before the battle begins. Look around to see who spawned nearby
0:00 — the horn	Leave the safe zone at once. In phase 1 only phase 1 buildings are available. **Take the Hospital at once**: it heals your side the whole battle

0–10 minutes	Station, Power Plant, Research Institute. The second squad takes buildings while the first hits enemy troops. Catch a weak enemy right after his teleport, while he has no shield
10:00	Central Lab, Armory and Electromagnetic Tower are open. **Switch forces to the lab** as the main priority
13:00	Wells appear. Send a separate squad to gather, do not touch the main one
10–25 minutes	Consolidate the advantage: favorable trades, more buildings, crates by scouts after every change of owner
Last 5 minutes	Do not chase new captures if you cannot hold them. Hold what you have and collect crates

9. Roles in the alliance

Assign them in advance:

- **Holders** — stand on buildings and do not leave;
- **Hunters** — catch enemy squads and finish them;
- **Rescuers** — cover allies under attack;
- **Capturers** — take empty buildings;
- **Crate collectors** — scouts on every change of owner.

10. Checklist

1. **Unity.** The whole alliance follows one plan.
2. **Roles.** Everyone knows their task.
3. **Priorities.** Hospital, then the other phase 1 buildings, from minute 10 the Central Lab.
4. **Reaction.** Answer enemy moves quickly and spend teleports wisely.
5. **Review.** After the battle analyze mistakes for next time.
6. **Preparation.** Enter 5 minutes early. Do not change heroes on battle day. Starters are locked before registration ends.
