VS: how to score more points

Alliance Competition · guide for clan DMP

The main idea. The VS day changes at **05:00 MSK** (Moscow time). Points are given for an action done on its «own» day, so we **stockpile what we need in advance and spend it on the day it counts**. Daily target: **3,620,000 points (8 chests)**. That is 21.7M a week, and the clan's weekly requirement of **20,000,000** is covered. **7,190,000 (9 chests)** is a strong contribution to the clan and to your own growth. Winning a day gives the alliance stage points (shown on the cards below): 1 / 2 / 2 / 2 / 2 / **4**, and Saturday weighs the most.

Requirement for chests 4–9. They open only after you research the **«Alliance Roster (VS)»** branch (the «Medium reward» and «High reward» nodes). Without it, no matter how many points a player scores, those chests will not open. The same branch gives up to +100% to all actions and up to +50% per category, so 9 chests become faster and easier. **Develop it first.**

Important. If you already have 9 chests and the clan is far ahead, or far behind, on that day, **do not spend everything**. It is better to keep your stockpile for next time.

MO Radar

Key items:

- Radar
- Fighter parts and chips
- Stamina
- Hero EXP

Pair with Mission Readiness (MSK):

05:00 hero upgrade
21:00 fighter upgrade

stage points: 1

TU Construction

Key items:

- Construction
- UR truck
- UR mission
- Survivor recruit

Pair with Mission Readiness (MSK):

05:00 and 01:00
construction

stage points: 2

WE Science

Key items:

- Research
- Research data
- Radar
- Component chests

Pair with Mission Readiness (MSK):

09:00
research

stage points: 2

TH Heroes

Key items:

- Hero shards
- Hero recruit
- Skill books
- Hero EXP

Pair with Mission Readiness (MSK):

13:00
hero upgrade

stage points: 2

FR Preparation

Key items:

- Troop training
- Construction
- Research
- Radar

Pair with Mission Readiness (MSK):

13:00 construction
17:00 training
21:00 research

stage points: 2

SA Enemy assault

Key items:

- Enemy assault
- UR truck
- UR mission
- Speedups

Pair with Mission Readiness (MSK):

09:00 construction
13:00 training
17:00 research

stage points: 4

MR («Mission Readiness») is a personal daily mission. Its tasks come in 4-hour slots, and each slot needs a specific theme (construction, training, research, hero or fighter upgrade). **Combine MR and VS:** when the slot theme matches the VS day theme, one action counts in both MR and VS. More in section 4.

1. What we do every day

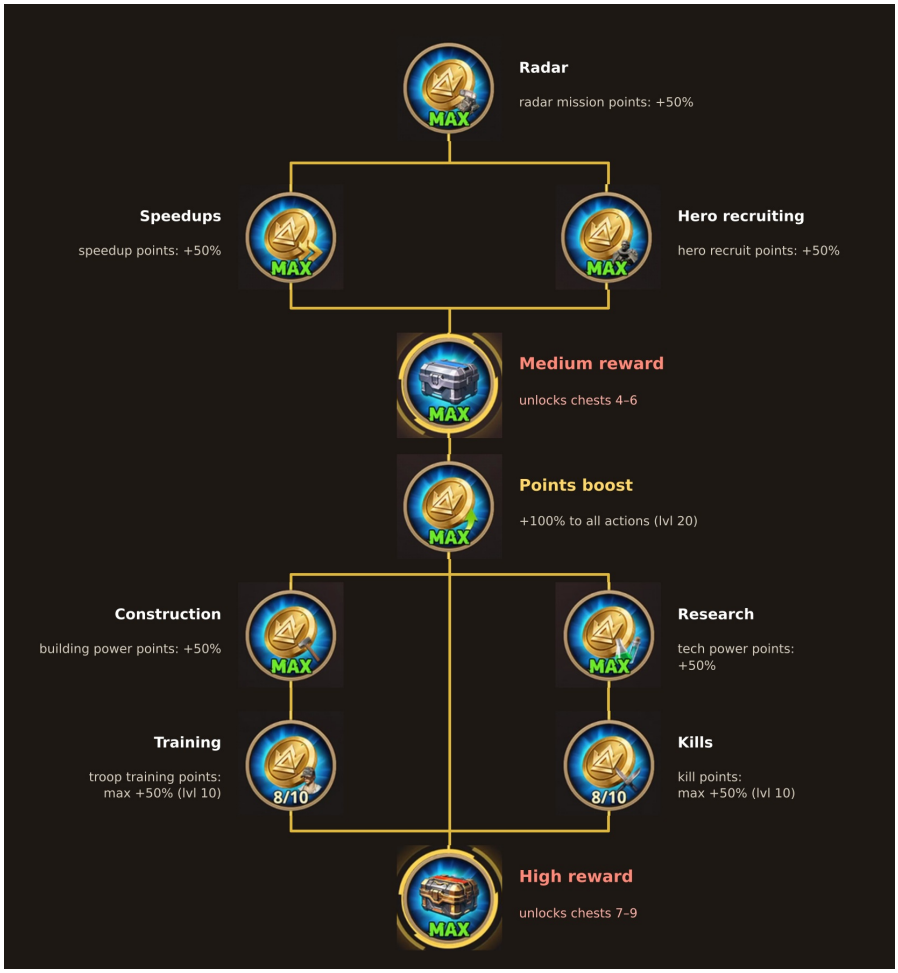

Points in the table are per action at **maximum bonuses** of the VS branch (+100% to all actions and +50% per category). Until the branch is maxed, the numbers in your game will be lower: open «Day theme» → «i» icon → «Points boost». We always stockpile **for the right day**: the table shows which day we start and which day we spend.

Day	What gives points	Stockpile and hold in advance
Sun **Rest**	No VS points on Sunday	• **Start stockpiling radar for Monday**: complete the missions, do not collect them
Mon **Radar**	• Radar mission: **26,250**. Complete and collect all day • Fighter part 5,200, fighter combat chip 8 • Stamina: 310 per unit. Some radar missions spend stamina, and it also counts for MR «fighter upgrade» • Hero EXP: 2 per 650 • Gathering food and metal: 6 per 10, oil: 6 per 6 (gathering from radar does not count)	• **On Sunday start stockpiling radar for Monday**: complete missions, do not collect. On Monday no need to stockpile anymore • Fighter parts, chips, stamina, hero EXP: stockpile for Monday, do not spend earlier • Send gathering squads 6–9 hours before the day changes
Tue **Construction**	• UR truck: **220,000** • UR Special Ops mission: **144,000** • Survivor recruit: 3,200 • Construction power: 275 per 10 • Construction speedup: 137 per minute	• Trucks and missions are not stockpiled: they appear every day. On Tuesday pick UR trucks and UR missions. If a truck or mission is not UR, upgrade it to UR first and only then send it • Finished buildings («checkmarks»): **ideally** do not collect from the day after your last collection and collect on Tuesday. It does not always work: the next level of the same building cannot start until the checkmark is tapped • Construction speedups: stockpile for Tuesday • **On Tuesday start stockpiling radar for Wednesday**: complete missions, do not collect
Wed **Science**	• Radar mission: **26,250**. Complete and collect all day • Research data: 640 per unit • Research power: 275 per 10 • Research speedup: 137 per minute • Fighter component chests: points grow with chest level, from 2,310 for a level 1 chest	• Component chests: stockpile **every one you get** for Wednesday • Research data and research speedups: stockpile for Wednesday • Research: **ideally** keep finished research uncollected until Wednesday. It does not always work: a new research cannot start until the old one is completed • On Wednesday complete and collect radar all day, stockpile nothing
Thu **Heroes**	• Hero shard: UR **21,000**, SSR 7,200, SR 2,100 • Hero recruit: 4,000 • Skill book: 24 • Hero EXP: 2 per 650	• Do not spend shards and tickets from Monday to Wednesday: stockpile for Thursday • First max out one main squad (level, stars, skills), then the next hero • **On Thursday start stockpiling radar for Friday**: complete missions, do not collect
Fri **Preparation**	• Radar mission: **26,250**. Complete and collect all day • Construction and research power: 275 per 10 • Training, construction and research speedups: 137 per minute each • Troop training: the higher the troop tier, the more points per soldier	• Radar: collect on Friday what you stockpiled since Thursday, then complete and collect all day, stockpile nothing • Constructions and research: keep the «checkmarks» from Sunday and collect on Friday (same caveats as Tuesday and Wednesday) • Training «ladder»: train one tier lower all week, upgrade on Friday • Stockpile shields and healing speedups for Saturday
Sat **Enemy assault**	• UR truck: **220,000** • UR Special Ops mission: **144,000** • Healing, training, research, construction speedups: 137 per minute each • Killing troops of the **matched opponent** is worth 5 times the normal amount • Your own losses also give points	• Healing speedups: stockpile for Saturday • Trucks and missions are not stockpiled: on Saturday pick UR. If not UR, upgrade to UR first and only then send • Stockpile shields and teleports **all week long** • Players who do not fight make up points with trucks, missions and speedups (see section 2)

2. Saturday: enemy assault

- **The raid starts at 5:00 MSK on Saturday,** that is, the moment the day changes. Before that, put up a shield, spend your resources and heal your troops: at dawn players from other servers burn bases that have no shield.
- **Stockpile shields and teleports through the week.** A shield drops when you scout or attack an enemy. You can put the shield on again **20 minutes after your last attack or scout**.
- Hit players of the alliance we are matched against in this VS: a matched kill gives 5 times more points than a normal one.
- **If you do not fight,** you can score points at the edge of another server's map: burning and attacking emptied or abandoned cities (in the clan this is called «hitting the bums»). Those cities must contain troops: points are given for killing them. Do this carefully and be ready to return to your own server immediately if there is danger.
- Stockpile healing speedups. Do not stockpile trucks and missions: they appear every day, on Saturday pick UR. If a truck or mission is not UR, upgrade it to UR first and only then send it. They give points to those who do not take part in fights too.

3. What to upgrade and what to spend on (in order)

Research branch «Alliance Roster (VS)». Opens chests 4–9 and multiplies points. The longest node is «Training and kills» (up to +50% at level 10).

Radar. Its level decides how many radar missions you can stockpile.

Barracks and troop tier. Friday gives many points for training, especially with a «ladder» of several tiers and training speedups.

Main hero squad to the maximum, then the next one. UR shards are 21,000 points each, stockpile for Thursday.

Speedups and «checkmarks». Stockpile universal and profile speedups for the right days (Tuesday, Wednesday, Friday, Saturday). Do not spend them on short constructions. Before a long timer, take the Minister post.

Fighter and gear. Do not waste fighter parts and chips, stamina, books and hero EXP: stockpile for Monday and Thursday.

Hero shards as steady income. Trucks, special ops, VS chests, alliance shops and events bring shards through the week. Do not spend them before Thursday.

4. Time (MSK): combine MR and VS

- **05:00 is the day change.** Whatever you collect before 04:59 goes to the previous day. Collect finished construction and research after 05:00 of the right day.
- **MR and VS run in parallel.** MR slots of 4 hours start at 05, 09, 13, 17, 21 and 01, and the VS day also starts at 05:00. When the MR slot theme matches the VS day theme, one action counts in both MR and VS. We do not count MR points here, the focus is VS.

VS day	MR slot (MSK)	What we do in this slot
Mon Radar	05:00 hero upgrade 21:00 fighter upgrade	05:00: collect stockpiled radar, spend hero EXP. 21:00: fighter parts and chips
Tue Construction	05:00 and 01:00 construction	Start long constructions, pour in speedups, collect finished ones. The 01:00 slot still belongs to Tuesday
Wed Science	09:00 research	Start research and speedups, spend research data, open component chests
Thu Heroes	13:00 hero upgrade	Spend shards, skill books and hero EXP
Fri Preparation	13:00 construction 17:00 training 21:00 research	13:00 collect constructions, 17:00 start training and training speedups, 21:00 research speedups. All three slots give VS points
Sat Enemy assault	09:00 construction 13:00 training 17:00 research	Speedups of these themes also give points on Saturday: pour them into these slots

- **Do not bend to a slot at the cost of your stockpile.** If, for MR, you would have to spend what you were saving for another VS day (shards until Thursday, speedups until Friday), take the MR slot later or skip it.
- **Saturday:** the shield must be up before 5:00 MSK.

5. Newcomers and veterans

Newcomers

- The goal is **3,620,000 every day**. That is 21.7M a week, and the clan's 20M requirement is covered.
- Each day spend only what belongs to that day, stockpile the rest for the right day.
- Mon: radar, parts and chips. Tue: UR missions and truck. Wed: data and chests. Thu: shards. Fri: training. Sat: shield and attack.
- Rewards for the daily contribution turn into points again: research data on Wednesday, shards on Thursday.

Veterans

- The goal is **7,190,000 (9 chests)** every day, especially on Friday and Saturday.
- Saturday is played with fighting, and those who do not fight put up shields.
- R4s post the day's announcement in chat the evening before: what to spend and what to stockpile. This removes desync.
- Help newcomers with the calendar and the 20M requirement.

Check the numbers in the game: they depend on how far the «Alliance Roster (VS)» branch is upgraded.
