Wingmen: the sky fighter and the wingman lab

Basis: game screens (account Antonii13, server 126). Data not seen on the screens is marked ⚠: worth checking in the game.

> **Main idea.** Wingmen work only together with the sky fighter. Wingman boost +1…+5 comes only from fighter stages: levels 150, 300, 450, 600, 750. So the first job is to grow the fighter itself.

1. How it works

- **The fighter** fights from high altitude and takes no damage itself. Part of its stats passes to all heroes in battle (the exact ratio is shown in the stats window).
- **Three wingman types** by hero class: Warrior, Assault, Tactical. Each type has 4 roles: spawn, attack, support, defense. 12 kinds in total.
- **The numbers are the same for all three types** (checked on the Warrior, Tactical and Assault screens). Only the class of heroes they help differs. So take wingmen of the class that stands in your main squad.
- **The wingman plan** contains one wingman of each role. You pick the plan before battle. There are 4 plans: they unlock at fighter levels 10, 150, 300, 450.
- **A wingman helps only heroes of its class** and only the squad whose plan is chosen: plan 1 is for squad 1, plan 2 for squad 2. A gold wingman of another class will do nothing for you.
- In the «Wingman Lab» (tabs Warrior / Assault / Tactical, buttons «Create» and «Bag») we create wingmen. An orange («ultra rare») wingman is created with an 8.333% chance for each of the 12 kinds.

2. Fighter stages

Fighter level	Stage	What it gives
10	I	Wingman system and plan 1 unlock
150	II	Plan 2, wingman boost +1
300	III	Plan 3, boost +2
450	IV	Plan 4, boost +3
600	V	Boost +4
750	VI	Boost +5
900	VII	Attributes grow noticeably; levels 751–900 together add more than +2M fighter power

By the «Level overview» screen, everything up to level 70 inclusive is open for you; from 90 it is locked.

3. How to upgrade the fighter

- **Materials.** Buttons «Quick add» (materials are placed automatically) and «Advance» (step to the next stage once the level is reached).
- **Inactive wingmen** can be fed into fighter upgrades. **Ultra rare (orange) ones cannot**: keep them for yourself.
- **Combat chip:** while the bar progress is below 80%, there is a 50% chance to get double experience. After 80% there is no crit. Conclusion: pour in chips until the bar reaches 80%, then finish the rest with something else.
- **Fighter parts:** no crit at all.
- Fighter levels 30 / 50 / 70 / 90 / 110 improve the «Hellfire Missile» skill (see the table below). Levels 1 / 40 / 100 / 140 / 190 / 250 unlock new aircraft.
- Experience for the fighter can be **bought**: you do not have to melt wingmen for it.
- Fighter components unlock at base level 15, up to 6 can be installed. I have not seen the «Component» window.
- The «Fighter upgrade» system and «Wingman plan» open from day 82 of the server.

4. Fighter level overview: skill and aircraft

The «Level overview» screen. The level 30 line is partly covered by a message in the screenshot; what is visible was read. Names are translated by meaning and may differ from the in-game wording.

Level	What unlocks
1	Skill «Hellfire Missile»: hits 2 front-line enemies first, physical damage equal to 360% ATK, cooldown 9 s. Aircraft RX-1 «Sky Eye»
30	Skill upgrade: jamming signal, targets hit by the bomb take 20.5% more damage for 3.2 s
40	Aircraft RX-2 «Viper»: fighter attack +5000
50	Module upgrade: +22% damage
70	Jamming signal: targets take +26% damage for 3.2 s
90	Module upgrade: bonus damage is now 45%
100	**Aircraft RX-3 «Orion»: attack of all heroes +5%**
110	Jamming signal: 26% for 4.2 s (duration up from 3.2)
140	**Aircraft RX-4 «Destroyer»: skill damage of all heroes +2%**
190	**Aircraft RX-5 «Phantom»: all heroes take 5% less damage**
250	**Aircraft RX-6 «Apocalypse»: +5% lethality against enemy soldiers in PvP**

Highlighted: aircraft that strengthen all heroes at once, a goal for long-term upgrading.

5. Where to get wingmen, evolution and costs

- **Ultra rare (orange):** a chest in the Glory shop; it can also be obtained for honor points.
- **Super rare:** alliance shop and VIP shop (for diamonds, up to 10 chests a week). ⚠
- **Rare:** the Trial shop. It also has a better chest with a higher chance (about 15%). ⚠
- **Hint in game:** in the plan window tap a chest and «Buy»: the game shows where it is sold and does not send you to the shop right away.
- **Advanced components** for creating come from gold chests in VS, up to 30 a day. Creation: ⚠ advanced wingmen cost 800 components, the rest 400. Check on the «Create» button.
- **Evolution only starts from purple.** Green and lower do not evolve. Evolution needs the same wingman of the same role and type (the icon on the card), and the higher the star, the more of them are needed.
- **Gold is noticeably better than purple.** For example, the purple attack wingman has no «+1 bombing target».
- No gold you need: put in any suitable one of your class. A smaller bonus, but better than an empty slot.
- An evolved wingman can be reset: ⚠ what exactly is returned is not visible on the screens.

6. What each role does

In brackets are the wingman names: Warrior / Tactical / Assault (translated by meaning). Cells with an orange background: «key evolution» (stars 2, 5, 8).

Spawn (Vanguard / Raven Eye / the Assault screen was not in the recording). At the start of battle heroes of the class get a 200k shield for 9 s; after it ends, all damage to the group is 4% lower until the end of battle.

Star	Effect
1	Shield up to 400k
2	**After the shield: damage to the squad is 8% lower**
3	Shield 600k
4	Shield 800k
5	**Damage reduction 12%**
6	Shield 1M
7	Shield 1.2M
8	**Damage reduction 16%**
9	Shield 1.4M
10	Shield 1.6M

Boost +1…+5: shield +80 / 160 / 240 / 320 / 400k and damage reduction +1 / 2 / 3 / 4 / 5%.

Attack (Cataclysm / Sky Hunter / Windbreaker). When the fighter bombs, ATK of heroes of the class +3% for 3 s; bombing targets +1.

Star	Effect
1	ATK 5%
2	**Bombing targets +2**
3	ATK 7%
4	ATK 9%
5	**Targets +3**
6	ATK 11%
7	ATK 13%
8	**ATK 17%**
9	ATK 19%
10	ATK 21%

Boost +1…+5: ATK +2.55 / 5.1 / 7.65 / 10.2 / 12.75%.

7. Support and defense

Support (Battle Cry / Coordination / Disruption). When bombing, back-line heroes of the class get +4% damage, and damage from enemy battle skills against them is 3% lower.

Star	Effect
1	Damage 7%
2	**Damage taken from enemy skills 7% lower**
3	Damage 10%
4	Damage 13%
5	**Reduction 11%**
6	Damage 16%
7	Damage 19%
8	**Reduction 15%**
9	Damage 22%
10	Damage 25%

Boost +1…+5: both damage and enemy damage reduction grow by 1.25 / 2.5 / 3.75 / 5 / 6.25%.

Defense (Bulwark / Barrier / Guardian). At the start of battle heroes of the class get +8.5% DEF, and the front line another +15% for the whole battle.

Star	Effect
1	DEF 13%
2	**Front line +30%**
3	DEF 17.5%
4	DEF 22%
5	**Front line +45%**
6	DEF 26.5%
7	DEF 31%
8	**Front line +60%**
9	DEF 35.5%
10	DEF 40%

Boost +1…+5: DEF +2 / 4 / 6 / 8 / 10%, front line +5 / 10 / 15 / 20 / 25%.

8. Order and stockpiling (my conclusions from this data)

- **1.** Bring the fighter to level 10 (the system and plan 1 unlock), then go for 150: that is the second plan and the first boost +1 for all wingmen at once.
- **2.** Take wingmen of one class, the same as your main squad. Other classes have the same numbers, but do not help the heroes of your squad.
- **3.** Stars 2, 5 and 8 are «key»: they give the most noticeable jumps (for example front line +30 / 45 / 60%, bombing targets +2 / +3). Put duplicates into them first: according to the game text, duplicates develop super rare and ultra rare wingmen. We do not spend orange ones on fighter upgrades.
- **4.** Extra (non-orange) wingmen go into fighter levels; pour in combat chips while the bar is under 80%.
- **5.** What to stockpile: gold wingmen of the right class and their duplicates, combat chips, fighter parts, advanced components from VS. It is better to open wingman chests in VS on the first day of the week.
- **6.** Long-term goal by fighter level: 100 (aircraft +5% attack for all heroes), then 140 and 190.

> **What was not on the screens, so I do not claim it:** material and duplicate cost for each star and for fighter levels; the «Component» window; the «Bag» screen; the Assault «Spawn» screen; the exact creation cost (800 / 400 marked ⚠). Send those screens and I will complete it.
